Health Information of Children and Young People under the age of 18

Under common law patients under the age of 18 who are determined to be a mature minor can consent to their own medical treatment. The child, or young person, must have “sufficient understanding and intelligence” to enable him or her to fully understand what is proposed as assessed by the general practitioner. As such, the general practitioner cannot go against the wishes of a patient if they are a mature minor and it can be a breach of their confidentiality and privacy to discuss their medical care with their parents against their wishes. At Golden Beach Medical Centre/Pelican Waters Family Doctors unless otherwise recorded by the general practitioner in the patient’s file/test results, patients aged 14 and over are afforded the individual right of privacy and confidentiality with their medical treatment by staff. To access information/results from a minors file aged 14 and over, the minor is requested to sign a consent to release form for their parent, which is scanned and recorded in the patient file.
